

TIETON CIDER WORKS

HUCKLEBERRY CIDER

TASTING NOTES

Huckleberries are one of the Northwest's great wild crops. The Cascade and Olympic Ranges provide this redish-purple berry to those who are willing to seek it out. Huckleberries are the summer ripened relative of the Raspberry and Blackberry, with a rich juicy flavor that falls somewhere between the two.

Tieton Cider Works is dedicated to showcasing the fruit our region has to offer. Our Huckleberry Cider is the perfect blend of these pressed Northwest berries blended with delicious Washington State apples. A guaranteed thirst quencher on hot summer days that also represents part of the bountiful Pacific Northwest.
